Recommended Use

Alaska is recommended for interior floors, interior walls, countertops, exterior walls, pool waterlines and full linings[†] in both residential and commercial applications. Alaska is not recommended for exterior horizontal surfaces or exterior paving. See CrossvilleInc.com for detailed installation instructions.

[†]Excludes mesh mounted mosaics.

Wet area use Mosaics

Crossville® produces Alaska 2 x 2 and Polygon Mosaics with the Cross-Sheen finish. The ANSI A326.3 wet Dynamic COF of Alaska is 0.42 - 0.52. Their small size ensures frequent grout joints which provides traction and drainage. Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Alaska to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Care and Maintenance

Regular cleaning is the best way to keep Alaska tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.
