Porcelain Mosaic

Sizes

Mosaic Tile

	Nominal Size (in)	Actual Size (mm)	Thickness (mm)	Grout Joint (mm)	Finish
2" Square*	2 x 2	47.5 x 47.5	6	2.6	Gloss/Matte
2" Hex**	2 x 2	47.5 x 47.5†	6	2.6	Gloss/Matte
3/4" Penny Round***	0.75 (diameter)	19 (diameter)	6	2.0	Gloss/Matte

* 2" Square is mounted on a 301 x 301 sheet (Coverage area 0.97263 sf)

** 2" Hex is mounted on a 272 x 326 sheet (Coverage area 0.83894 sf)

*** 3/4" Penny Round is mounted on a 292 x 324 sheet (Coverage area 0.99617 sf)

† 2" Hex tile measures 47.5mm from one straight edge to the opposing parallel edge

Product Performance

Breaking Strength	>350 lbf	ASTM C648
Chemical Resistance	Resistant	ASTM C650
Water Absorption	≤0.20%	ASTM C373
Scratch Hardness	7	Mohs Scale

Wet Dynamic Coefficient of Friction Range

Gloss	<0.42	ANSI A326.3
Matte	<0.42	ANSI A326.3

Shade & Texture Index

Multiplier has a shade variation of V1.

This porcelain tile product is produced with a V1 variation. Differences among pieces from the same production run are minimal. Inspect the product upon delivery and for best results, blend tile from several cartons during installation.

2" Hex Mosaic

Application Areas

Finish	Interior Floors (dry)	Interior Walls (wet/dry)	Exterior Walls (covered)	Interior Floors (Standing water/shower floors)	Exterior/Paving	Pool/Fountain Full Lining**	Water Line Pool/Fountains
Gloss and Matte	✓	✓	✓	✓†			✓

✓† Note: Tile selection for wet applications (such as shower or bathroom floors) requires careful consideration of the unique nature of the design and installation. For instance, the industry standard for tile used on level interior surfaces is a dynamic coefficient of friction (DCOF) value of 0.42 or greater; however, the use of small (2" or less) mosaics with lower DCOF values may nonetheless be acceptable for projects with an increased number of grout joints, along with the presence of other surface structures that provide both traction and a means for water to drain and dissipate from the area. It is the sole responsibility of each end user to consult with a design professional to determine and select the most suitable flooring for a particular project.

** Excludes mesh mounted mosaics. Crossville recommends face mounted or edge mounted mosaics for fully submerged applications. Contact your Crossville sales representative for more information.

NOTE: Trim applications will differ from field tile applications for the same series. For more information on ANSI- A362.3 visit our website at <https://www.crossvilleinc.com/Resources/Tile-101/DCOF?tab=1>

Features and Benefits

- Three colors and three shapes, this concise offering quickly expands with possibility
- 2" Square, 3/4" Penny Round and 2" Hexagon mesh mounted mosaic for easy installation
- Attractively priced, grow your creativity, without growing your budget.
- Multiplier can help grow your creativity, without growing your budget

Care and Maintenance

Regular cleaning is the best way to keep Multiplier tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

Recommended Use*

Multiplier tile is recommended for Interior Floors Dry, Interior Walls Dry, Interior Walls Wet, Exterior Walls, Exterior Covered Walls, Waterline Pool/Fountain, Countertops in residential and commercial applications.

* The tile applications featured in this publication are for illustration purposes only and are not intended as a representation or warranty of the suitability of Crossville Tile for any particular application. Specifically, tile selection for wet applications (such as shower or bathroom floors) requires careful consideration of the unique nature of the design and installation. For instance, the industry standard for tile used on level interior surfaces is a dynamic coefficient of friction (DCOF) value of 0.42 or greater; however, the use of small (2" or less) mosaics with lower DCOF values may nonetheless be acceptable for projects with an increased number of grout joints, along with the presence of other surface structures that provide both traction and a means for water to drain and dissipate from the area. It is the sole responsibility of each end user to consult with a design professional to determine and select the most suitable flooring for a particular project.
